Air Conditioning & Heating

ENERGY EFFICIENCY IS THE KEY...

...TO CONTROLLING THE COSTS OF HEATING YOUR HOME

Provide your family with temperature-consistent heating comfort they can depend on.

As a homeowner, you try to find a balance between your family's comfort and your monthly energy costs. Introducing the Goodman® brand GMVC8 Gas Furnace. It's one of the most impressive furnaces we make, and we built it with your comfort in mind.

PRECISE ROOM-TO-ROOM TEMPERATURE CONTROL

Goodman's GMVC8 Gas Furnace with two-stage heating and a variable-speed circulating blower provides a total comfort home-heating alternative – efficiently and economically. This furnace's variable-speed circulating blower reduces operating costs and advances home comfort by reducing temperature swings and air stratification from floor to ceiling. Unlike non variable-speed furnaces that run "all on" or "all off," a Goodman brand variable-speed furnace typically runs 90% of the time in the low-heat capacity on most days, but when the weather is very cold, ramps up to high-heat capacity so that your family stays warm and snug.

Unmatched combination of performance, efficiency and affordability. That's just what you'll get with Goodman.

QUIET OPERATION

Your Goodman brand Furnace uses a multi-speed induced draft blower motor and variable-speed circulating blower to reduce the noise levels common in other furnaces without these features. Since this unit typically runs in low-heat stage 90% of the time, the impact of the normal high-fire sound is eliminated up to 90% of the time. Add to that a fully insulated, heavy-gauge steel cabinet, and the result is...quiet comfort.

YEAR-ROUND ENERGY SAVINGS

Energy efficiency is key to controlling the cost of heating your home. The Department of Energy (DOE) established the Annual Fuel Utilization Efficiency (AFUE) system to calculate the annual operating cost of home furnaces. This Goodman furnace's 80% AFUE rating means 80 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of every \$1.00 of heating energy expense warms your home. The remaining 40 cents is lost energy—wasteful and expensive.

INDOOR AIR QUALITY

This Goodman GMVC8 furnace's variable-speed circulating blower slowly circulates the air throughout your home, gently passing the air over your filters more often and therefore creating cleaner indoor air.

QUALITY MANUFACTURING BACKED BY OUTSTANDING WARRANTIES*

**LIFETIME
HEAT EXCHANGER
LIMITED WARRANTY***

RELIABILITY AND LONG LIFE

The heart of any furnace is the heat exchanger. Our patented, aluminized-steel tubular heat exchanger and stainless-steel recuperative coil have been tested to industry standards. And for further safety and reliability, we also include our high-quality Silicon Nitride Igniter, the most durable igniter in the industry, that helps ensure safe start-ups and maximum igniter life.

Additionally, the Goodman brand GMVC8 Furnace is designed to minimize NOx emissions, contributing to better air quality.

OUTSTANDING WARRANTIES*

We back our Goodman GMVC8 Variable-Speed Furnace with what we believe to be one of the best warranties* in the industry. In addition to covering this unit with a **Lifetime Heat Exchanger Limited Warranty*** for as long as you own your home, we promise that **if the heat exchanger fails during the first 10 years on the original, registered homeowner, we will replace the entire unit.** This Goodman furnace also has a full **10-Year Parts Limited Warranty*** on all other functional parts.

For even greater peace of mind, ask your dealer or visit our web site at www.goodmanmfg.com for more details about **GoodCare®** an affordable Parts and Labor Extended Service Plan for your entire Goodman brand HVAC system.†

GOODMAN: THE RECOGNIZED INDUSTRY LEADER

Every Goodman brand heating and air conditioning system is designed, engineered, and manufactured with pride. All employees follow strict, quality-driven processes to ensure that all Goodman products offer the legendary performance that has made the brand a recognized leader in the industry. This attention to quality has resulted in the Goodman family of companies becoming the second largest unit manufacturer of residential air conditioning and heating systems in North America.

The legacy began when Harold Goodman, a former air conditioning contractor, felt that he could build a better product. His goal was, and our goal remains, to manufacture air conditioning and heating equipment that performs more reliably, lasts longer than the competing products and eliminates time-consuming installation problems.

And, of course, he endeavored to make air conditioning and heating products as affordable as possible. Harold accomplished his goal and today the Goodman family of companies manufactures heating, air conditioning and ventilating equipment in modern facilities.
